

## My First Webinar: Start Kafka Clusters in SECONDS

You're about to learn how to start Apache Kafka in the next section, but I recommend you also attend my webinar 

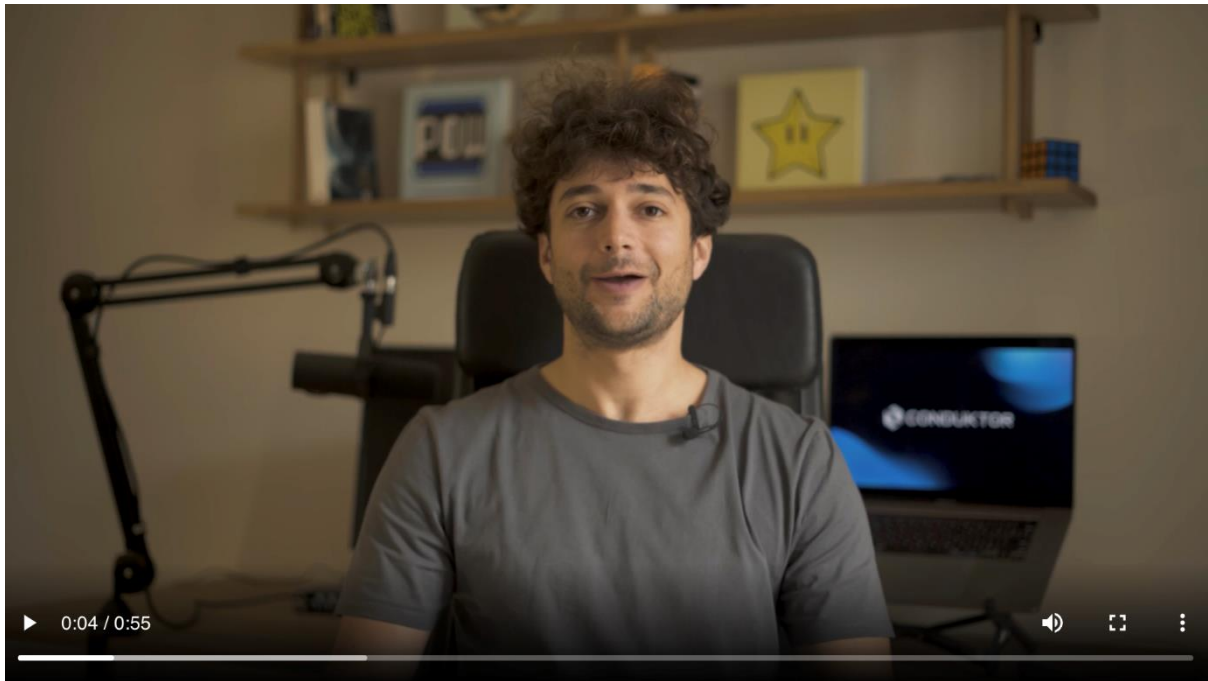

**This is my FIRST webinar in 5 years of teaching and I'm super excited for it!**

I want to tell you about something that I think you are going to love.

With [Conduktor](#), you can now start Kafka clusters in a couple of clicks (including Schema Registry!). We built this powerful new feature to get you up and running with Apache Kafka faster than ever before.

**Join me** for an action-packed webinar on [March 28th, 2022](#). In just 15 minutes, I will deep dive into this new feature, answer your questions and tell you about some of the other cool stuff we're building at Conduktor.

This is not to be missed and places are limited so book now!

[Register for Webinar](#)

I hope you can join us to explore this game-changing new feature that we've developed for the Apache Kafka community.

This capability is open to all users, absolutely free in our latest version of **Conduktor**. You can learn all about it and [even try it out yourself right here.](#)

**Happy learning!**

Stephane
